

### **Specification Amendments**

Please replace the paragraph on page 9, line 15 with the following:

Another layer that can be contained on the coin is a bezel layer 106. This bezel layer can be placed over the customizable part of the coin. This bezel allows a crystal or some other glass piece to be applied over the customizable face of the coin. Using a bezel technique helps protect the customized artwork that is applied to the coin. The bezel can also be applied to the precious metal or semi-precious metal face of the coin. The bezel layer can be considered yet another layer of the coin. In the prior art, a coin manufacturer has not been able to use a multi-layered coin approach to provide a customized coin for any customer who desires one. This third layer of the coin 106 may also have or include precious and semi-precious stones, a crystal layer and/or a glass layer.
